

SAMPLE of a NCHLA e-mail alert:

Immediate Action Required to Protect Women & Unborn Children

Senate May Act Tomorrow!

NCHLA via votervoice.net

Dear Friend,

Can you please take a moment right now from your busy day to help defend life? I am writing to you because your Senator is a member of the Senate Veterans' Affairs Committee. They are scheduled to take action tomorrow, Wednesday July 22, to consider Senator Patty Murray's "Women Veterans and Families Health Services Act of 2015" (S. 469). Despite its name, it is almost entirely devoted to funding in vitro fertilization (IVF) and the freezing and thawing of human embryos as a solution for veterans' infertility problems.

Click [here](#) to send a message to your Senator. Please hurry! Today may be our only chance to urge the committee to respect the life and health of these women and children.

Please urge your Senator, a member of the Veterans' Affairs Committee, to oppose this legislation. For the first time, Congress would make taxpayers support such creation and manipulation of human life in the laboratory as a "health service." IVF involves at least an 85% death rate for any embryos involved, and poses dangers for any children born alive as well as for women who are "harvested" for their eggs. Since 1995, federal funding for research involving IVF has been forbidden in Health and Human Services programs due to its high risk to early human life. The Department of Veterans' Affairs should not violate that pro-life policy.

Thank you, dear friend, for responding to this urgent call to action. Together, we will be heard!

Sincerely,

Amy McInerny
Executive Director

P.S. I know you are busy, but you can quickly defend vulnerable lives against this legislative threat by clicking [here](#) .

Compose Your Message [*not necessary if you read and agree with the letter already composed by NCHLA*]

Recipients: [*NCHLA fills in automatically via your address*]

• Senator Richard Blumenthal

Subject
Oppose S.469

Body:

Please oppose committee consideration of S. 469 to fund the laboratory creation and freezing of human embryos. In vitro fertilization has a very high death rate for early human lives and poses well-documented dangers for women and children. Our tax dollars for assisting veterans and their families would be better focused on life-affirming treatments for infertility and adoption assistance as needed.
